

Replies to Freedom of Information Request AU UK CA

What should be established first and foremost is the existence of the "virus" itself before doing any attempt of correlation to the disease we call "COVID-19". If the "virus" has not been proven to exist then the disease called "COVID-19" does not exist either, especially since the symptoms of "COVID-19" are not unique in the sense that it's an entirely new disease and instead share the same symptoms as with regular flu.

1. The existence of the "virus" has not been proven even after all these months and this is the basis of everything we experience right now. By existence I mean that the particle which "virologist" look at has been isolated and purified and demonstrated through experiments and empirical science to be both pathogenic and harmful where it is only found in unhealthy subjects and not healthy. This is Koch's Postulates, the logical and scientific rules to identify an infectious agent. Since that has not been done then nobody can claim that the particle they look at is a killer "virus".
2. All tests are based on the existence of the "virus", since that has not been established then all tests and numbers are entirely meaningless. Also, in order for any test to be accurate it needs to be tested against the isolated and purified "virus" which is considered the gold standard but that has never been done. Not only that but the PCR were never meant to be used as a diagnostic test, it was designed to be used as a research tool to multiply small amounts of DNA/RNA. Antibody tests doesn't mean anything either since some people do not produce antibodies while others do and antibodies are not specific enough. This is even admitted by places like the CDC.
3. Because there is no "virus" where all tests are entirely meaningless then nobody on earth knows how many people that actually got ill or the true cause of their illness since the true cause of illness has never been investigated.
4. Since the true cause of illness has not been established then most if not all people that come into the hospital are being mistreated. Mistreatment of patients can lead to their deaths. As an example, medical errors in the US have been said to be the 3rd leading cause of death. In April it came out a report regarding New York that 97.2% of the people over the age of 65 that were put on a ventilator died. They died because of the ventilator, not due to the "virus" which has not been proven to exist.
5. All policies that has been created the past few months are unlawful and unjustified since the existence of the "virus" has not been established where all testing and numbers are meaningless.

Dear [REDACTED]

Informal request for information

I refer to your informal request for information held by the NSW Ministry of Health for the following information:

"All records in the possession, custody or control of The Department of Health describing the isolation of a SARS-COV-2 virus, directly from a sample taken from a diseased patient, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka vero cells; lung cells from a lung cancer patient). Please note that I am using "isolation" in the every-day sense of the word: the act of separating a thing(s) from everything else. I am not requesting records where "isolation of SARS-COV-2" refers instead to:

- the culturing of something,
- Or the performance of an amplification test (i.e. a PCR test),
- Or the sequencing of something.

Please also note that my request is not limited to records that were authored by The Department of Health or that pertain to work done by The Department of Health. My request includes any sort of record, for example (but not limited to) any published peer reviewed study that The Department of Health has downloaded or printed."

Preliminary searches for information were undertaken by the relevant areas within the Ministry of Health, and it was confirmed, that from our understanding of the scope of your application, we do not hold the information requested.

It has been suggested internally that you contact NSW Health Pathology to discuss your request further to determine whether they may or may not hold any relevant information.

However, information has been identified that may assist with your inquiry this information is publicly available.

Information publicly available

The following information is publicly available. Please find below resources that may be of use to answer queries the Ministry has received in regards to SARS-COV-2 testing. They are:

NSW Ministry of Health
ABN: 92 697 599 630

Dear Health Ministers,

I am writing to you on advice from the Australian Department of Health (the Department) to seek clarification on information requested in a Freedom of Information (FOI) request that was sent to the Department.

The Department's initial response on 24th August 2020 (attached: "Initial FOI 1937 Response"), stated: "To obtain the information you are seeking please direct your request to the various State and territory Departments of Health".

After further correspondence between the FOI author and the Department, a more formal response was given (attached: "FOI 1937"), yet the outcome remained the same.

I am therefore writing to you to on initial advice by the Department of Health to confirm whether you do hold the information requested in the original request to the Department, as shown in attachment "FOI 1937" and pasted again below:

"All records in the possession, custody or control of The Department of Health describing the isolation of a SARS-COV-2 virus, directly from a sample taken from a diseased patient, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka vero cells; lung cells from a lung cancer patient). Please note that I am using "isolation" in the every-day sense of the word: the act of separating a thing(s) from everything else. I am not requesting records where "isolation of SARS-COV-2" refers instead to:

- the culturing of something,
- or the performance of an amplification test (i.e. a PCR test),
- or the sequencing of something.

Please also note that my request is not limited to records that were authored by The Department of Health or that pertain to work done by The Department of Health. My request includes any sort of record, for example (but not limited to) any published peer reviewed study that The Department of Health has downloaded or printed."

I look forward to your response.

Dear [REDACTED]

Freedom of Information Request to Commonwealth Department of Health

Thank you for your email of 24 February 2021 to Ms Rachel Stephen-Smith MLA, Minister for Health about your Freedom of Information request to the Commonwealth Department of Health, and seeking records describing isolation of a SARS-COV-2 virus directly from a sample taken from a diseased patient. Minister Stephen-Smith has asked me to reply on her behalf.

I am advised that ACT Pathology does not have the ability to isolate the virus from patient samples. Accordingly, I do not believe that the ACT Government holds any records relevant to your request.

Thank you for writing to the Minister about this matter.

Yours sincerely

Bernadette McDonald
Chief Executive Officer
Canberra Health Services

Your Access Request No. 2020-08

Irene Harrison <Irene.Harrison@oahpp.ca>
To: Christine Massey <cmssyc@gmail.com>

Wed, Aug 4, 2021 at 10:47 AM

Dear Ms. Massey,

I am writing to you in connection with your request for access to information, specifically for:

All records in the possession, custody or control of the Ontario Agency for Health Protection and Promotion aka Public Health Ontario (PHO) describing the isolation of a SARS-CoV-2 virus, directly from a sample taken from a diseased patient, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka vero cells; lung cells from a lung cancer patient).

Please note that I am using "isolation" in the every-day sense of the word: the act of separating a thing(s) from everything else. I am not requesting records where "isolation of SARS-CoV-2" refers instead to:

- the culturing of something, or
- the performance of an amplification test (i.e. a PCR test), or
- the sequencing of something.

Please also note that my request is not limited to records that were authored by PHO or that pertain to work done by PHO. My request includes any sort of record, for example (but not limited to) any published peer-reviewed study downloaded or printed by PHO.

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each record with certainty (i.e. title, author(s), date, journal, where the public may access it).

The type of work described in your request is not done by Public Health Ontario (PHO) and there are no records at PHO that are responsive to your request.

PHO performs testing for SARS-CoV-2 virus, the virus that causes COVID-19, but the work that PHO does has been excluded from your request as per paragraph 2. Information about PHO's COVID-19 testing is available on our website:

- Coronavirus Disease 2019 (COVID-19) – PCR
- Coronavirus Disease 2019 (COVID-19) – Serology
- COVID-19 Virus Variant of Concern (VoC) Surveillance — see SARS-CoV-2 (COVID-19 Virus) Variant of Concern (VoC) Surveillance

Dear Freedom of Information and Privacy Coordinator,

This is a Freedom of Information Request for Access to General Records, made under FIPPA.

Description of Requested Records:

All records in the possession, custody or control of the Ontario Agency for Health Protection and Promotion aka Public Health Ontario (PHO) describing the isolation of a SARS-CoV-2 virus, directly from a sample taken from a diseased patient, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka vero cells; lung cells from a lung cancer patient).

Please note that I am using "isolation" in the every-day sense of the word: the act of separating a thing(s) from everything else. I am not requesting records where "isolation of SARS-CoV-2" refers instead to:

- the culturing of something, or
- the performance of an amplification test (i.e. a PCR test), or
- the sequencing of something.

Please also note that my request is not limited to records that were authored by PHO or that pertain to work done by PHO. My request includes any sort of record, for example (but not limited to) any published peer-reviewed study downloaded or printed by PHO.

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each record with certainty (i.e. title, author(s), date, journal, where the public may access it).

Format:

PDF documents sent to me via email; I do not wish for anything to be shipped to me.

RE: Your Access Request No. 2020-08

Irene Harrison <Irene.Harrison@oahpp.ca>
To: Christine Massey <cmssyc@gmail.com>

Thu, Jun 3, 2021 at 1:04 PM

Dear Ms. Massey,

Thank you for following up with Public Health Ontario (PHO) about your request for:

All records in the possession, custody or control of the Ontario Agency for Health Protection and Promotion aka Public Health Ontario (PHO) describing the isolation of a SARS-CoV-2 virus, directly from a sample taken from a diseased patient, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka vero cells; lung cells from a lung cancer patient).

Please note that I am using "isolation" in the every-day sense of the word: the act of separating a thing(s) from everything else. I am not requesting records where "isolation of SARS-CoV-2" refers instead to:

- the culturing of something, or
- the performance of an amplification test (i.e. a PCR test), or
- the sequencing of something.

Please also note that my request is not limited to records that were authored by PHO or that pertain to work done by PHO. My request includes any sort of record, for example (but not limited to) any published peer-reviewed study downloaded or printed by PHO.

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each record with certainty (i.e. title, author(s), date, journal, where the public may access it).

Public Health Ontario recognizes that Freedom of Information (FOI) processes are an important service and a right for Ontarians, but in these extraordinary circumstances, public health and safety are of utmost importance. During the COVID-19 pandemic response, our ability to process FOI requests is directly impacted and we continue to experience delays related to:

- the conduct of full and comprehensive searches for records by program areas which may be prioritizing critical COVID-19 response activities in connection with the emergency;
- our ability to conduct reviews of those responsive records that have already been received from program

Response – Pennine Acute Hospitals NHS Trust

1. I would like to know the number of cycles you have been using on PCR (Polymerase Chain Reaction) test as standard and if that number has ever been changed at anytime for whatever reason.

The Trust uses the following Commercial CE IVD assays - Hologic Panther, Cepheid, BD Max, Abbott Alinity, Abbott M2000 and AusDiagnostics Hi-Plex. The number of thermal cycles across all the platforms in use varies slightly and the maximum is 42; the parameters for all these assays are available from the commercial suppliers. The Trust does not alter them for any reason.

2. I would also like to know how many children under the age of 16 have been logged as a death from SARS-CoV2 without any underlying health issues.

The Trust is unable to provide figures of those who have died from COVID-19. In the spirit of the FOI Act, the Trust can provide information on those with a positive COVID 19 test within 28 days of death.

There were less than 10 children who died within 28 days of a positive COVID-19 test result.

The Trust applies an exemption under section 41 (1) of the Freedom of Information Act (Information provided in confidence in relation to patients that are deceased and are not afforded rights under the GDPR) and has not provided any figures less than 10.

3. And can you tell me if you have any records of SARS-CoV2 going through Koch's Postulates.

The Trust has not recorded any cases going through Koch's Postulates.

Salford | Oldham | Bury | Rochdale | North Manchester

The total number of patients who have died with a positive COVID-19 test within 28 days of their death with no previous existing health conditions between March 2020 and 8th December 2020 at Salford Royal NHS Foundation Trust is <10

The total number of patients who have died with a positive COVID-19 test within 28 days of their death with no previous existing health conditions between January 2021 and March 2021 at Salford Royal NHS Foundation Trust is <10

The Trust applies an exemption under section 41 (1) of the Freedom of Information Act (Information provided in confidence in relation to patients that are deceased and are not afforded rights under the GDPR) and has not provided any figures less than 10.

The Trust is unable to differentiate between those who died with or from COVID-19. However, in the spirit of the FOI Act, the Trust is able to provide the following information of the total number of patients who have died with a positive COVID-19 test within 28 days of their death:

432 patient's deaths have been submitted into the Covid-19 Patient Notification System (CPNS) via NHS England within the time frame of March 2020 to the 16th of December 2020 at Fairfield General Hospital

155 patient's deaths have been submitted into the Covid-19 Patient Notification System (CPNS) via NHS England within the time frame of March 2020 to the 22nd of January 2021 at the Royal Oldham Hospital

***Figures for April to July 2021 will be published by the end of September 2021 (exempt under section 22 of the FOI Act – intended for future publication)*
